SPRICE, WARING'S BLOCK, CORNER OF BANK AND 57. CLAIR STREETS. YESTERDAY AFTERNOON'S REPORT

BURNING OF THE CRYSTAS PALACE. The destruction of the Crystal Palace with its contents yesterday was complete. So rapid did the flames spread that in twenty five minutes from the commencement of the fire the mamense deom fell. Nothing was saved except one hose carriage, a hook and ladder carriage, and some half a dozen articles of triffing value.

The fire originated as stated last night in the lumber room and was the work of an incendiary.—There were in the building at the time 2,000 persons, principally women and children.

The loss is variously estimated at from one million to one and a half million.

The Palace originally cost eight hundred thousand dollars. One estimate makes the worth of the articles on exhibition about half a million. Three fire engines belonging to the city and valued at the commencement of the fire the mameuse deem

fire engines belonging to the city and valued at from \$2,000 to \$3,000 each were destroyed. Two

from \$2,000 to \$3,000 each were destroyed. Two
of these had been placed in the building but a few
nours before the fire commenced.

There were nearly 4,000 contributors to the Exhibition, some of whose losses were quite large.
The American institute lose \$10,000. There
were among the losses 15 engines, valued at \$30,000, 40 pianos, including 12 of Chickerings \$20,000, turning lathes \$16,000, sewing machines
\$6,000, knitting machines \$7,000, dagaerreotype
department \$6,000, plows \$15,000, vehicles of different kinds \$15,000. Watch, clock and jewelry
department loss very heavy. Fire deportment con-Assives.—The Schooner Harmon, Captain Gale, arrived in port yesterday, from Liverpool, "sound and in good condition."

Silves Plate.—The service of plate presented to E. B. Phillips, Esq., by the employees of the C. & T. Road can be seen for a short time at the store of Messrs Benton & Mathivet, the designers and procurers. It consists of twelve pieces—a salver, two pitchers, a slop bowl, and eight goblets, the whole being valued at \$725. The pieces are most elegantly engraved and chased and the whole forms the most splendid set we have seen for a long time. On the salver, beside the engravings, appropriate emblems of a Railroad man's life, is the following inscription:

"Preserted to Elijah Brigham Phillips by the off-cers and employees of the Cleveland & Tole to R. R. To., Sept., 1858."

Call and see this splendid set.

Assive Plate.—The service of plate present-index of the pool of the plate present-index of the case of the plate present-index of the case of diamonds valued at \$35,000. Among the works of art lost were Marochettis status of Washington, who was a status of Daniel Webster, Coloneal Group, Man struggling with a Bear, Group of the "Lovers going to a well," with many other piecos, including life size busts of O'Connell, Moore, Fater Matnew, Washington, &c.

The color of the case of the Cleveland & Tole to Flijah Brigham Phillips by the off-cers and employees of the Cleveland & Tole to Flijah Brigham Phillips by the off-cers and employees of the Cleveland & Tole to Flijah Brigham Phillips by the off-cers and employees of the Cleveland & Tole to Flijah Brigham Phillips by the off-cers and employees of the Cleveland & Tole to Flijah Brigham Phillips by the off-cers and employees of the Cleveland & Tole to Flijah Brigham Phillips by the off-cers and employees of the Cleveland & Tole to Flijah Brigham Phillips by the off-cers and employees of the Cleveland & Tole to Flijah Brigham Phillips by the off-cers and employees of the Cleveland & Tole Sale, arrived in port yesterday, from Liverpool,

Call and see this splendid set.

No doubt the fire was the work of an incendiary. A strong smell of camphene was detected in the building where the fire commenced. Previous to the fire a boy was seen dodging about between the Palace door on 42d street and a liquor shop opposite, and just before the alarm was given three boys were seen hurrying away from 42nd street entrance, and running at rapid speed from the street. The supposition is that tags or other material were saturated with camphene, lighted and thrown into the lumber room.

Dan Rice.—This showman has been successful here, as, he is everywhere. Should he stay here a week, he would have crowded audiences every night.

Long life and success to Dan and his trained.

The record that one was the work of an incendiary. A strong smell of camphene was detected in the building where the fire commenced.

Previous to the fire a boy was seen dodging about between the Palace door on 42d street and a liquor shop opposite, and just before the alarm was given three boys were seen hurrying away from 42nd street entrance, and running at rapid speed from the street. The supposition is that tags or other material were saturated with camphene, lighted and thrown into the lumber room.

There is mothing left standing of the Palace but the iron side.

Everything combustible about the building and contents are reduced to ashes. The iron parts of the machinery and other articles on exhibition, to gether with the frame work of the building, are one undistinguishable mass. The glass is fused in No doubt the fire was the work of an incendia

 The manner of stopping the wikration of the string.
 The accessing of the site attack,
 They make yet of the tene.
 They are the string. . The great length of time which the least

conds.

I will illustrate the philosophy of the two kinds of instru-ments, and leave the reader to draw his own conclusions. In the Hallet, Devis & Co. Pienes have a greater length of string than those of any other make in the same eracel cage. The truth of this atmost may be seen at a glance, as nearly the entire length of a straight string can be used for vibration, iso diagram; with those that are best, accessarily law the rest or bridge pin inserted at a great distance from the end of the plane; older the nagels would be so great the atting would be concert pick.

unever pitch.
It's wall known that the reason a six-octave plane does not exerce the full store and signify of the roll a sover-octave plane is not its strings are size for. With the above improvement, a be octave limited, Davis d'un plane is enabled to send out a size and roller tone than a seven octave plane of any other make. man a resultin certain occupies no more scales than simply its voits white a hunt string recytres in addition use diagram; cam nor its angle, from the bridge to the tuning pix. The re-rette is the best strings are necessarily so close together that iter often hit one accutier, and harshy jugge with the perform-ence playing beauty matribut, faminates and variations. The trainfraitments have as much reconstituted they thread result

3, The manner of stopping the vibration. he hammer sirikes it, may be bridge, where it is supposed by the tone of the best visible in the world can be ruised by substituting a poor bridger, thus proving that the hous of a string is state-tuning off-cod by the subsect in which the whereful is atterped. The whreston of the strings in the H. D. & C. piano is wimped with little heritantal frets of expect or bell metal (see diagrams F) giving to the string a soft, full, mellow injustions, while in all other pianos the whreston is supposed by unright in manner, less observable in the house of the string as off, is supposed by the control of the string in soft, is supposed to the string in the strin that has caused incursions of persons, having one nunces or agreements to exclaim.

"I do not like the fremy learny of a plane ! It is far inferior to the full rich time of an organ, flute or neleddeen."

The reason that the strings in all other planes are bent at the bridge in that a sharp single has to be such in order is stop the wheeling. In the R. D. E. C. plane the strings are drawn price.

The foregoing plane of the Hallet, David. E. C. plane is an imple, includ and ununevariable, but I will guarantee to give a straight over the cupper frest and held down firm thereon by the Suxpension Bridge. [See diagram S. B.]
